

Pre-Sales Monitoring System - User Manual

Status: USER TESTING PHASE - Please report all issues on Slack notification channel

System Overview

Data Flow: Google Forms → Master Sheet → FreshSales CRM (automatic sync every 30 minutes at :02 and :32)

Master Sheet: https://docs.google.com/spreadsheets/d/1Ux8iEW8dabbEMUq1mEhrpY6a0WAUTCTR_8kvZ-hLHaQ

Form Submission Sources

Form	Editor URL	Public URL
-----	-----	-----
Returning Students	Edit	Submit
ATS Qualifiers	Edit	Submit
Website Form	Edit	Submit
Early Bird	Edit	Submit

Master Sheet Operations

Status Assignment (Controls CRM Sync)

Status	Sync Behavior
-----	-----
Hot	Syncs to CRM immediately (high priority)
Warm	Syncs to CRM immediately (medium priority)
Not Interested	Syncs to CRM (marked inactive)
First Call Pending	Does NOT sync - stays in Master Sheet only

Owner Assignment

Use `assigned_owner` column to assign contacts: **Unassigned, Kevin, Agnes, Eklavya, Ashish**

Key Auto-Populated Columns

- duplicate_flag:** Set by Google Apps Script when duplicate exists in Master Sheet
- new_existing:** Set by sync ("New Parent" or "Existing Parent" based on CRM check)
- crm_contact_link:** FreshSales contact URL (populated after first sync)
- last_synced_at:** Last successful sync timestamp (IST timezone)
- Light red row background:** Indicates row has been synced to CRM

Sync Process (Runs Every 30 Minutes at :02 and :32)

Step 1: Duplicate Detection - Checks if parent email/mobile exists in CRM, updates `new_existing` and `crm_contact_link`

Step 2: Forward Sync to CRM

If New Parent:

- Creates Parent Contact in FreshSales with status and owner
- Creates Child Deal linked to parent
- Adds notes to contact
- Updates Master Sheet with CRM link and light red background

If Existing Parent:

- Does NOT create new Contact
- Adds secondary email/mobile if different from existing (additive update)
- Creates new Child Deal (sibling support)
- Updates Master Sheet with existing CRM link

Step 3: Status Verification - Runs at :04/:34 to verify contact status set correctly

What Gets Created in FreshSales CRM

Parent Contact: name (from parent_name), email (parent_email), mobile (parent_mobile), status (Hot/Warm/Not Interested), owner, tags (from source)

Child Deal: child_name linked to parent contact

Notes: Submission timestamp, source form, additional notes

Duplicate Handling

Within Master Sheet: Google Apps Script sets duplicate_flag = "Yes" when email/mobile already exists in sheet

With CRM: Sync system finds existing parent by email/mobile, sets new_existing = "Existing Parent", performs additive update (adds secondary email/mobile without overwriting), creates new Child Deal for sibling

Notifications

Slack: Posted to team channel after every sync at :02/:32

- J1: Duplicate detection results
- J2: Forward sync stats (processed/created/updated/skipped/errors) with details of each created contact (name, CRM link, status, owner)
- J3: Status verification schedule

Email: Sent to rajesh@genwise.in, eklavya@genwise.in, gifted@genwise.in

- When: New form submissions arrive
 - What: Individual lead details for immediate follow-up
 - Note: Sync reports sent only via Slack
-

Valid Dropdown Values (Use Exact Values)

Status: First Call Pending, Warm, Hot, Not Interested **assigned_owner:** Unassigned, Kevin, Agnes, Eklavya, Ashish
duplicate_flag: Yes, No **source_tag:** returning_students, ats_qualifiers, website, early_bird

User Testing Instructions

Post on Slack notification channel:

- Description of issue
- Screenshot if applicable
- Timestamp
- Master Sheet row number
- Expected vs actual behavior

Common Test Scenarios: Multiple children per parent (siblings), parent with multiple emails/phones, status changes from First Call Pending → Warm/Hot, owner reassignments

Quick Troubleshooting

Record not syncing? Check: (1) Status is Warm/Hot/Not Interested, (2) parent_email and child_name filled, (3) Wait 30 min for next sync, (4) Check Slack for errors

CRM link missing? Check: (1) last_synced_at timestamp exists, (2) No errors in Slack, (3) Refresh sheet

Duplicate not detected? Email/mobile must exactly match existing record (case-insensitive), wait one sync cycle for new_existing update

Contact: Rajesh (rajesh@genwise.in) for urgent issues or questions
